## **STAN MCCLELLAN JOINS ZNYX NETWORKS' MANAGEMENT TEAM**

**FREMONT, CA — August 2, 2006** — ZNYX Networks, the leading provider of high-availability embedded networking solutions for communications, today announced the appointment of Stan McClellan, Phd. to the position of Vice President of Business Development and Chief Architect of Systems & Solutions. A 20-year veteran with experience in telecommunications, enterprise, and aerospace industries, McClellan will report to Connie Austin, President & CEO of ZNYX Networks. "The addition of Stan to our executive team provides ZNYX with significant technically-focused solution experience at a critical point in our business expansion," said Austin. "His business & market experience will be important in managing key partner relationships, and his technical depth allows him to influence the architecture of next-generation systems based upon customer requirements."

Prior to joining ZNYX, McClellan held positions in telecommunications, commercial, defense, and academic industries. Recent experience includes executive positions as Distinguished Technologist & Technical Director at the Hewlett Packard Company, and Principal Architect & Director of Applications Engineering at SBE, Inc. At HP, he was the Worldwide Solution Architect and strategist for telecommunication platforms, and a Principal Architect of HP's ATCA (PICMG3) product line. McClellan has previously served as a technology & business consultant for commercial entities including BellSouth Telecommunications, MCI/Worldcom, Motorola Semiconductor Group, Cisco Systems, 3Com, Alcatel, Nortel, Network Equipment Technologies (N.E.T.), and The Southern Company.

### **About ZNYX**

ZNYX Networks is the leading global provider of embedded networking solutions - high availability transport infrastructure and scalable network elements - for CarrierClass™ systems. Equipment manufacturers and systems integrators use ZNYX Networks technologies to create solutions with continuous service, high-performance, scalability and strict compliance to telecommunications standards. The ZNYX Networks family of hardware, software and professional services products provides design engineers with a significant "time-to-market" advantage by leveraging pre-built and pre-tested modular embedded network elements. These modular building-blocks are designed in strict compliance with open, forward-looking industry standards such as PICMG3.x (ATCA) and IETF ForCES.

Privately held, ZNYX Networks is headquartered in Fremont, California, with advanced research centers in Santa Barbara, San Francisco and Ottawa, Canada. Sales and professional service offices are in North America, Europe and Asia. For more information, see [www.znyx.com](http://www.znyx.com), e-mail [sales@znyx.com](mailto:sales@znyx.com) or phone (510) 249-0800.
